

## Development of Personality

**Different strokes for different folks.** It would be wonderful if there were one way to figure out how a person develops his/her personality... but it isn't that easy. Different psychologists have different approaches.

Within your group, you are to try to understand the key elements of ONE particular personality theory and prepare to share your newly acquired knowledge with the class.

***What would be important to share?*** Key people, a synopsis of the theory, how/why neurosis occurs. Use the info packets from class and look up your theory in the book. Piaget is ONLY in the book on page 465.

Frankl's Existentialism

Freud's Psychosexual

Skinner's Behavior Shaping

## Piaget's Periods of Cognitive Development

## Maslow's Humanistic Hierarchy

## Erikson's Eight - Psychosocial

## Jung's Unconsciousness
